DEPARTMENT OF PUBLIC SAFETY
DIVISION OF STATE POLICE

The publication "Crime in Connecticut - 1989" is the twelfth annual report on crime in Connecticut. This information is based on statistics collected by the Connecticut Uniform Crime Report Program. Every police department in the state has participated in the program for the year 1989.

This document illustrates the nature, volume and extent of crime reported in Connecticut. Its purpose is to provide law enforcement administrators with data for effective decision-making and make the public aware that crime within our state is a serious problem requiring attention from every segment of society.

I would like to thank all Connecticut Law Enforcement Agencies for their participation and support of the Uniform Crime Report Program.

The Uniform Crime Reporting Program

Purpose

The Uniform Crime Reporting Program periodically measures crime in the United States by counting those offenses brought to the attention of law enforcement agencies. The program's objective is to produce reliable criminal statistics for Law Enforcement administration, operation, and management. Criminal Justice professionals, legislators, scholars, and others concerned with crime problems make frequent use of UCR-generated statistics.

National Program

Uniform Crime Reporting was initiated in 1929 when the International Association of Chiefs of Police (I.A.C.P.) standardized procedures for crime data collection. On June 11, 1930, Congress enacted legislation authorizing the Federal Bureau of Investigation to collect nationwide crime counts and to serve as the clearinghouse for such data. The Committee on Uniform Crime Records of the I.A.C.P. continues to advise the F.B.I. in the operation of the UCR Program and offers them a valuable link to local police departments.

State Program

In July, 1977, Connecticut began its own Uniform Crime Reporting Program. By August of the same year, data collection began with the recruitment and training of 70 agencies. Today, Connecticut has 100 full-time police departments participating in its UCR Program.

The State Program ensures quality control and uniformity of the crime and arrest reports submitted. The centralized state collection agency streamlines the time-consuming process of resolving questions between contributors and verifiers. Upon completion of the quality control process, the returns are forwarded to the F.B.I.

Types of Data Collected

Every month law enforcement agencies throughout the state submit UCR data. They indicate the number of offenses brought to their attention through such sources as victim, police, or witness reports. The UCR Program defines Crime Index offenses as the following: Murder and Non-negligent Manslaughter, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, Motor Vehicle Theft, and Arson.

After counting Crime Index offenses reported, minus any unfounded complaints, contributors provide the number of "actual offenses" and the number of crimes cleared. For a criminal offense to be "cleared", either of two situations must prevail: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) some element beyond police control precludes the physical arrest of the offender, resulting in the offense being cleared by "exceptional means". Contributing agencies also include data on the value of property stolen and recovered in connection with the aforementioned offenses, plus specific information regarding homicides and arson.

UCR arrest data is collected for all crimes except traffic violations. The age, sex, and race of arrestees are reported for all crime categories.

Reporting Procedure

Contributing agencies are responsible for submitting their own crime reports to the State UCR Program. A full-time field representative offers training in Uniform Crime Reporting procedures to ensure quality and uniformity in the data submitted to the State Program. Contributors also receive the Uniform Crime Reporting Handbook which provides a detailed outline of offense classifying and scoring procedures.

Verification Procedure

UCR reports are set up with numerous internal cross-checks to achieve reporting accuracy of the data. It is standard operating procedure to examine each incoming report for arithmetical accuracy. Reports are then subjected to logical tests of reasonableness, which are of key importance to confirming validity. Logical errors resulting from misinterpretations of what is to be measured can then be corrected. UCR personnel correct minor errors without contacting contributors, but necessary arithmetical adjustments or unusual variations are brought to the attention of the submitting agency.

UCR Limitations

There are inherent limitations in current crime reporting practices. Of primary importance is the question of how much crime is being reported. The degree to which crimes are being reported varies from area to area. A considerable volume of crime is not reported to law enforcement agencies because the victims consider the offenses against them to be of very little consequence or that the likelihood of apprehending the suspect is small. They may also fear retaliation from offenders, or are reluctant to reveal their own involvement in the offense or in other crimes. Consequently, information concerning some offenses is never entered into the reporting system.

Even with these given limitations, the UCR Program provides the best network of State and National crime figures currently available.

Crime Factors

Because not all factors that have an impact on crime problems are measured or considered by the UCR Program, superficial conclusions are sometimes drawn from its crime and arrest data, particularly when attempts are made to compare jurisdictions. Local ordinances and criminal justice administrative policies, record-keeping practices, and the degree of adherence to Uniform Crime Reporting standards all affect the number of crimes and arrests reported. Additionally, socio-economic conditions and the characteristics and attitudes of the local population influence the extent and nature of criminal behavior in a community. The following factors must be taken into consideration before an informed assessment of crime data can be made:

- Density and size of the community population and its surrounding area.

- * Variations in the composition of the population, particularly its age, sex, and race composition.
- * Stability of population with respect to such factors as commuters, seasonal residents, and other transient types.
- * Economic conditions, including unemployment.
- * Cultural conditions, such as educational, recreational, and religious characteristics.
- * Climate.
- * The trafficking and abuse of drugs in the community.
- * Effective strength of law enforcement agencies.
- * Administrative and investigative efficiency of the local law enforcement agency.
- * Policies of other components of the criminal justice system, such as prosecutorial, judicial, correctional, and probational.
- * Attitudes of citizens toward crime.
- * Crime reporting practice of citizens.

Future of the UCR Program

The State Uniform Crime Reporting Program and the Connecticut Chiefs of Police UCR Redesign Committee are working together to produce an Incident-Based Reporting System. The National Incident-Based Reporting System (NIBRS) will be used as a model for design and implementation.

In the future, police departments will send crime data by floppy disk, magnetic tape or by on-line transmission. The advantages to this type of system are: less paperwork for police departments, better uniformity and validity of crime data, a uniform method of collecting data and a superior criminal data base for analysis.

For the first time in Connecticut, police will have a collection of data that can be used to address pressing law enforcement issues. Information collected under NIBRS will address most of the major criminal justice issues in Connecticut. Some of the issues include: weapons offenses, drug/traffic offenses, spousal abuse, elderly abuse, domestic violence, pornography, alcohol related offenses, white collar crime, and missing children.

Together, the Connecticut Chiefs of Police and the State Police, with the financial assistance of the Bureau of Justice Statistics, can make this system work.

**CONNECTICUT
CRIME INDEX OFFENSES**

INDEX CRIME

The tabulations presented in the graphs and charts in this publication illustrate the volume, fluctuation, and distribution of index crime in Connecticut. The Index is composed of those crimes considered to represent the most serious by nature or by the volume in which they occur.

Crime classifications used in the Crime Index are: Murder and Non- Negligent Manslaughter, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny, and Motor Vehicle Theft.

ARSON

Arson is defined by the Uniform Crime Reporting Program to include any willful or malicious burning, or attempt to burn with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willingly or maliciously set are classified as arsons. Fires of suspicious or unknown origin are excluded.

Since Arson offenses frequently occur in conjunction with other Index Crimes; e.g., Burglary, the Hierarchy Rule has been modified specifically for Arson. Arson, regardless of its occurrence in conjunction with another crime against person or property has to be reported.

**CRIME INDEX OFFENSES
BY COUNTY**

INDEX OFFENSES BY COUNTY

In 1983, Connecticut began compiling County data. Caution must be taken in attempting to make direct comparisons between counties. Many demographic factors including density and size may affect criminal behavior incidents and the reporting thereof.

According to population figures supplied by the F.B.I., Connecticut's eight counties in descending order of population are: Hartford (844,863), Fairfield (818,817), New Haven (795,874), New London (248,060), Litchfield (166,609), Middlesex (139,960), Tolland (125,633), and Windham (99,184).

STOLEN AND RECOVERED**

PROPERTY STOLEN AND RECOVERED

For further analysis of crime, the Uniform Crime Reporting Program collects supplementary reports relating to properties stolen and recovered by type and value.

Although Connecticut law enforcement agencies recovered approximately 41% of the property stolen, the net loss was over \$116 million dollars.

The reader should take note that these values relate only to Index Crime. Property lost or damaged as a result of crimes such as fraud, vandalism, etc., are not included in these totals.

**CONNECTICUT
ARREST DATA**

ARREST DATA

The Connecticut Uniform Crime Reporting Program requires the submission of monthly reports concerning persons arrested in the state. A record of total arrest activity for criminal acts in both Part 1 and Part 2 crime classes is received from UCR participants according to the Age, Sex and Race of persons arrested. Traffic arrests, except driving under the influence, are not reported.

The Age, Sex, and Race of Persons Arrested Forms are designed to collect data on the number of persons arrested and not the number of charges lodged. For example, a person may be arrested on several charges at one time; only one arrest would be scored. For UCR purposes, a juvenile is counted as "arrested" when circumstances are such that if he or she were an adult, an arrest would result.

**LAW ENFORCEMENT
EMPLOYEE DATA**

POLICE EMPLOYEE DATA

As of October 31, 1989, 100 agencies covering 3,239,000 Connecticut residents reported a total of 7,203 full-time law enforcement officers. When full-time civilians are included, the total is 8,809 law enforcement employees.

Before making comparisons in police strength from one municipality to another, serious consideration should be given to the many factors that affect the need for police service. For example, the need for law enforcement service in a seasonal or highly mobile community differs from a locale whose population is stable. Other factors that affect police service are geographic location, density of population, nearby urban areas, and community interest in law enforcement.

1989 SUMMARY ANALYSIS

Law enforcement agencies in the State reported a total of 8,809 full-time police employees for 1989.

There were 7,203 sworn police officers employed by law enforcement agencies, 81.8% of the total law enforcement employees.

Full-time civilian employees were reported at 1,606; 18.2% of total law enforcement employees.

94.4% of all full-time law officers were male, 5.6% were female.

67.4% of all full-time civilians were female, 32.6% were male.

Of the 7,203 full-time sworn police officers, 86.3% were Municipal and 13.7% were State Police.

**FAMILY VIOLENCE
ANNUAL REPORT**

Statistical Summary

1989 Family Violence Arrest Cases

There were 21,909 incidents of family violence in which at least one person was arrested during 1989. This represents a 2.6% increase in the number of incidents over 1988.

Nearly nine in ten cases involved an arrest for assault, breach of peace or disorderly conduct. In 42.2% of cases the most serious offense for which an arrest was made was assault. Breach of peace was the most serious offense in 23.9% of cases and disorderly conduct was the most serious offense in 21.7% of cases.

83.3% of victims were female and 88.5% of offenders were male.

For forty-four percent of victims their relationship to the offender was "live-in" (live together, ever lived together, share a child). Half (49.0%) of Both arrestees were live-ins.

More than half (59.4%) of the participants were between the ages of twenty-one and thirty-five.

Physical force was the most serious weapon used in 72.1% of the incidents.

Prior orders existed in 15.7% of the incidents in which that history was known (Restraining or Protective Orders).

Incidents in which serious injury occurred declined 7.6% since 1988 (serious injury has declined for two straight years).

Liquor/drugs were involved in half (50.5%) of the incidents in which that information was known.

Thirty-seven percent of incidents occurred on Saturday (18.8) or Sunday (18.1%).

Forty-four percent of incidents occurred during the six hour period between 6:01 p.m. and midnight.

Children were present or directly involved in 44.7% of incidents. Specifically, children were involved in 10.4% of cases and present in 34.3% of cases.

Definitions

ARREST INCIDENT: An occurrence of family violence in which at least one arrest has been made. One arrest incident is counted for each Family Violence Offense Report submitted; regardless of the number of parties arrested.

BREACH OF PEACE AND DISORDERLY CONDUCT: Crimes of threatening; harassment and reckless endangerment may be reported under either breach of peace or disorderly conduct.

BOTH (ALL) PEOPLE ARRESTED: An individual is assigned the status of BOTH when involved in a family violence incident in which all parties were arrested. Each participant who has been coded as BOTH has committed an offense involving family violence, and therefore cannot be considered a "pure" victim. However, an individual classified as BOTH cannot be classified as a "pure" offender either, since s/he has also been the target of a violent domestic crime. Note that these incidents frequently involve more than two people.

FAMILY OR HOUSEHOLD MEMBERS: Spouses; former spouses; parents and their children; persons eighteen years of age or older related by blood or marriage; persons sixteen years of age or older who are presently residing together or resided together in the past; and persons who share a child in common regardless of their marital status or living arrangement.

FAMILY VIOLENCE: An incident resulting in physical harm; bodily injury or assault; or an act of threatened violence that causes fear of imminent physical harm; bodily injury or assault between or among family or household members. Verbal abuse or argument alone does not constitute family violence. Nor are acts of parents or guardians in disciplining their minor children classified as family violence unless such acts constitute abuse. In order for an offense to be classified as family violence, there must be present danger, the likelihood that physical violence will occur and the relationship between the parties conforms to the definition of "Family or Household Members."

FAMILY VIOLENCE CRIME: A crime as defined in section 53a-24 of the Connecticut General Statutes which contains as an element an act of violence directed at a family or household member.

HIERARCHY OF OFFENSES: Although multiple offenses are frequently reported, particularly for multiple arrest incidents, only one offense code is accepted into the computer system. When there are multiple offenses, the offense code highest in the following list is accepted: homicide; assault; kidnapping; sexual assault; criminal mischief; risk of injury to a minor; breach of peace; disorderly conduct; and other.

INJURY: A serious injury is a physical injury which creates a substantial risk of death; or which causes serious disfigurement; serious impairment of health or serious loss or impairment of the function of any bodily organ. A minor injury means impairment of physical condition or pain. Non-physical injuries include threats and attempts to cause harm.

LIVE-IN: Persons presently residing together or who have resided together in the past; and persons who share a child in common.

"OTHER" CRIME: Offenses included under the classification of "Other" include all family violence crimes which are not covered by the offense types listed. "Other" crimes include, but are not limited to: robbery; burglary; arson; and criminal trespass.

RELATIVE (SAME/OTHER HOME): Includes parents and children; brothers; sisters; aunts; uncles; in-laws; cousins; etcetera.

Family Violence Homicide 1989

Introduction

The following summarizes cases of family violence homicide which occurred during 1989. Homicides were chosen for rigorous analysis because the small number of incidents allow examination of each piece of descriptive information available concerning the act and the parties involved. Such close scrutiny would not be possible for other types of family violence offenses such as assault due to the great number of offenses and the character of data available.

Family violence homicides which occurred during 1989 resulted in either the arrest or suicide of the offender. Information on arrest cases was taken from Family Violence Offense Reports submitted to the Family Violence Reporting Program and verified as homicides through the reporting agency and/or the Uniform Crime Reporting Program (UCR). Murder-suicide information was taken from UCR records.

Of the 190 homicides reported to UCR during 1989, thirty-two (16.8%) were verified as conforming to the definition of "Family or Household Member" as set forth in the Connecticut General Statutes (Title 46b, Section 38a(2)).*

* Note that while the total number of UCR homicides includes offenses which may have occurred in prior years and were not reported until 1989, the incidents identified as family violence only include offenses committed during 1989. Also, the definition of "Family or Household Member" can be found in the definitions at the beginning of the family violence section.

Of the thirty-two family or household members who were victims, two-thirds were female. Half (46.9%) of the victims were relatives (parent, child, grandparent, etc.) of the offender.

Eighty percent of the thirty offenders were male (one arrest incident involved two offenders). Females accounted for 20.0% of the offenders while, overall, females accounted for 7.6% of all the homicides reported during 1989 (information taken from UCR reports). Guns or knives were used in 78.1% of the homicides.

Murder-Suicide

In one-third (34.4%) of the homicides the offender committed suicide. Two of the offenders were previously arrested for family violence (one prior arrest each).* Eight of the eleven victims were female and all eight of the offenders were male. Five of the victims were relatives of the offender, three were spouses and three were live-ins. Guns were used as the murder weapon in ten of the eleven murder-suicides.

Arrest

During 1989, there were twenty-one homicides for which a family or household member was arrested.

*Information taken from Family Violence Reporting Program computer files using names and dates of birth supplied by the law enforcement agency where the incident occurred. Records reflect data from October 1, 1986 through to the time of the incident.

Thirteen victims were female and eight were male. Ten of the victims were relatives, six were live-ins, four were spouses and one was the former spouse of the offender.

Sixteen of the twenty-two offenders were male and six were female. Eight offenders used guns, seven used knives, five used physical force and two used some other dangerous weapon.

Prior court orders (Restraining or Protective Orders) had been issued in two of the sixteen incidents for which that information is known.

Children were either involved as victims or present as witnesses in ten of the twenty-one homicides.

Liquor/drugs were involved in seven of the fifteen incidents for which that information is known.
